

Janice Rudd

Principal of Pinecrest School in Northridge

Not too long ago, I found myself trying to obtain the technology necessary to ensure that the students of Pinecrest had enough computers with the advanced operating systems necessary to participate in the "Alice" computer program. Not only did Scenewise, Inc. step forward and donate all the teaching materials necessary to offer my students an advanced learning opportunity like Alice, but the company also helped the school improve the operating systems which were available.

Beyond the materials Scenewise offered to help us improve our hardware and software options, the company also donated something more meaningful, time. They provided our students with a program coordinator to facilitate the class along with an outline network available to help with the Alice program.

Our students were inspired and given a unique opportunity to participate in a computer program that otherwise wouldn't have been available to them. We thank Scenewise for their vision for student-teacher advancement and their willingness to share "Alice" with us.
